

The Association of Iranian Human Rights and Allies condemns in the strongest terms the European Union's recent actions, which constitute a blatant violation of Iranian sovereignty over the Greater and Lesser Tonb and Abu Musa islands. These islands have been an integral part of Iran's territory for centuries, and any attempt to undermine this sovereignty is unacceptable.

We call upon the international community to recognise and respect Iran's territorial integrity and to support the rightful claims of the Iranian people. The EU's actions not only disregard international law but also threaten regional stability and peace. It is imperative that the EU ceases and take back its provocative and wrongful declaration.

The Association of Iranian Human Rights and Allies stands firm in its commitment to defending Iran's sovereignty and promoting peace and justice in the region. We urge all nations to uphold the principles of international law and to work towards upholding Iranian rights when the current illegitimate regime in Tehran is destabilising the region.
